Airblast Canpacter Can Crushers

Can crushing unit for efficient disposal of paint tins

Front: Crushes all types of metal cans, tins, paint drums and paint pails up to 30 litres.

Airblast Canpacter Can Crushers

Description

The Airblast Canpacter unit crushes all types of metal cans, tins, paint drums and paint pails up to 30 litres, compacting cans up to a sixth of their original size with ease.

This not only offers cost savings on waste skip transport charges to landfill sites but also helps to maintain a safer, tidier workspace.

Once a paint drum to be processed is placed within the can crusher, the joystick is depressed to start the approximate 20 second cycle, during which the door is locked by an automatic safety system.

Containers positioned in the can crusher are automatically pierced without removing the lids, alternatively the same devices drain solvent deposits when required for desposal and a removable drip tray catches any paint, oil or other liquids which may be expelled from the container during the crushing cycle.

Canpacter 5 litre bench top machine and Canpacter 205 litre drum models also available. The Canpacter can crushers are available to buy online at: www.airblasteurospraydirect.com.

Features

- Safe and easy operation
- No electrical installation required
- Full height viewing window
- Robust construction
- Maintenance free
- Powder coat finish

Technical Specification

Overall height:
2020mm

Overall width:
665mm

Overall depth:
485mm

Depth when door open:
810mm

Crusher time cycle:
20 seconds (based on a 30 litre pail)

Air requirements:
215dm³/cycle @10bar/145psi
